

## Building Trades

A career in Building Trades can open the doors to many different work opportunities in construction, from the building of highways and bridges to the installation of kitchen cabinets.

With an emphasis in carpentry, the program prepares you for a career in the building trades through a blend of classroom theory and hands-on experience. You will become adept at using hand tools, portable power tools and other equipment common in the carpentry profession as well as working with lumber, panel products, roofing materials, fasteners and a variety of hardware. You will develop the skills needed for rough framing, roof framing, and exterior and interior finish work, in addition, to studying blueprint reading, math and estimating.

Students get hands on experience by building a residential home each year – typically valued at \$250,000+ upon appraisal.

- 1 year certificate
- Articulation Agreement with multiple colleges
- 2 year AAS degree 1+1 with NCMC
