

Grand River Technical School
Chillicothe, Missouri

Diesel Services Technology

Diesel technicians are needed now more than ever before. The diesel engine is the driving force behind the nation's trucks, buses, and heavy equipment. Why? Because the diesel engine produces more power and is more durable than the gas engine.

The field of diesel equipment technology is wide open, just waiting for motivated individuals to explore it! Technicians must be flexible, adapting to customers' needs and the newest technology available. Those who have the skills in math, problem solving, computers and public relations are in high demand, and these skills are needed every day in a diesel career.

- 1 year certificate
- Articulation Agreement with multiple colleges
- 2 year AAS degree 1+1 with NCMC
